

TASKI IntelliPower Li-Ion Battery and Charger 36V

Power and performance

New generation of Li-Ion batteries and charger for small TASKI machines

Harnessing the latest battery technology and super fast charger, the IntelliPower 36V range of batteries and charger brings new levels of performance and flexibility to TASKI's range of small machines.

IntelliPower 36V brings you:

Powerful 36V Lithium battery.
Up to 2hrs run time*

Extended run time depending upon application. Scrubbing and vacuuming at the same performance levels as cable machines is now achievable without compromise.

Super fast charger.
1hr recharge time**

A multi voltage charger for any region or country. Short recharge times. Infinite autonomy is now possible with 2 x batteries. Re-charge 1st battery whilst using the 2nd battery. Swap when needed.

Freedom & safety
Up to 97% saving, zero risk of trips

No cable means no trip hazard and no risk of electric shock. Use anywhere, anytime. No constraints. Perfect for public areas, mobile and transport cleaning. No cable can mean up to 97% unproductive time saved normally spent on preparation, safety checks, and clean down.

Performance
100% increase

IntelliPower harnesses the latest lithium batteries, combined with TASKI digital motors to achieve up to double the levels of performance and run time compared to older batteries and carbon brush motors***.

Legendary quality & longevity
2-year warranty / 2000 cycles

The TASKI ergodisc brand has an enviable reputation for quality, reliability and ergonomics. Highest quality, robust construction and ultra reliable. Up to 2000 cycles for extended longevity.

Sustainability
Up to 40% energy saving

Up to 40% energy saving compared to cable machines. Short recharge time means chargers are plugged into the electricity supply for less time. Depending upon application batteries can have a lower carbon footprint than high wattage cable machines.

TASKI IntelliPower Li-Ion Battery and Charger 36V

Ultra compact battery

A range of really compact lithium batteries that are much lighter than traditional batteries means more applications than ever can now use batteries. High output means no compromises.

Fast recharge time

Recharged in just 1.0hr (60mins) **. With extra batteries the autonomy is limitless. Spare batteries can even be stored or charged whilst on TASKI Trolleys.

Flexibility & reduce cost

The same TASKI IntelliPower 36V can be used with multiple TASKI machines. Huge synergies and cost reduction from standardization means TASKI can provide a lithium machine for daily cleaning applications. One common charger means multiple batteries can be charged.

Low Total Cost of Ownership

Up to 2000 cycles and a very short recharge time, means the savings compared to traditional batteries soon add up. Less replacements means big savings. More resistant to the damage caused by 'opportune charging' lithium is perfect for frequent use applications. Divide the total number of charge cycles by charge cycles per year to calculate theoretical lifetime. More charge cycles used per day will accelerate battery replacement.

Technical Data			
IntelliPower Li-Ion Battery 36V 14.5Ah (lithium-Ion)		IntelliPower Li-Ion Multi Chargers 36V	
Nominal Voltage (V (DC))	36V	Input Voltage (V)	100-240V AC / 50-60Hz
Nominal Capacity (Ah)	14.5	Output Voltage Nominal (V)	36
Charging Cycles	2000	Charging Current (A)	10
Battery Weight (kg)	3.5	Charger Weight (kg)	1.7
Dimensions LxWxH (mm)	245 x 158 x 85	Dimensions LxWxH (mm)	262 x 191 x 140
		Charging Time 80% charge ** (mins)	60
		Charging Time full cycle (100%)	90
